## [PDF] How To Create Chef Cookbook In Git Repository Stack

Seems you're taking git as a chef tool. git is a versioning system (as svn for exemple), it is not chef specific. knife is used to create a cookbook skeleton, this is not mandatory, but it helps you create the correct directory structure and creates the metadata.rb with correct attributes too.

## [PDF] Cant Find Monit Template Issue 29 Elastic Cookbook

I'm very new to chef (and ruby) so i could be completely off the mark, but it appears the problem occurred when the elasticsearch cookbook was not the primary recipe being executed (is there such a thing? like i said, i'm very new to this!). in my app i used it as a git submodule specified using cookbooks\_path in my vagrantfile.

## [PDF] There Is No Customize Recipe Issue 326 Elastic

In the readme it states to use a customize recipe which does not exist. this commit introduced it: ... we've re-written the cookbook using libraries that expose resources and providers, so you shouldn't see this problem on the newer version; it should also be much easier to customize. hope this helps! martinb3 closed this jul 7, 2015.
